Connect Beam Seating

Benel

Connect, Combine, Complement

Connect – a truly patient-centric series. Designed to meet the unique requirements for healthcare settings, Connect Beam Seating is the answer to all your concerns about safety, maintenance, and versatility.

Strong, secure, and safe. Sturdy armrests offer the necessary support. For extra safety, we have designed the armrests of Connect Beam Seating to be fully attached to the backrests. The absence of gaps between the two ensures no accidental hooking of straps, fabric, or other mishaps. Connect gives you that ease of mind.

Features of Connect Beam Seating

01 No Perforations

For ease of maintenance and infection control, surfaces are smooth without perforations.

02 Armrests – Safety Consideration

Armrests are connected to each chair's backrest so that there are no gaps to allow for bag straps or clothing to be caught.

03 Armrests – Ease of Use

Specially designed armrests allow bag straps or clothing to slide off easily, reducing the risk of falling.

04 Armrests – Additional Support

Sturdy and extended armrests provide additional assistance to weaker patients in getting up from their seats.

05 Minimised Protrusions

To ensure overall safety, we have kept the chair legs within the areas of the seats, minimising the risk of tripping.

06 Colour Choices

Contemporary design with a colour palette that matches all modern designs of clinical waiting areas or gives life to older clinical areas.

07 Certification for Safety

ANSI/BIFMA X 5 4 Lounge and Public Seating

We have specially requested the testing center to multiply the load factors for specific clauses by 1.3 times to prove that our product is extra safe and can provide extended durability, even for people of heavier weights.

08 Certification for Low Chemical Emission GREENGUARD GOLD

Connect Beam Seating is certified for low chemical and VOC emissions to ensure improved indoor air quality for everyone.

Product Specifications

Dimensions

Product dimensions are in millimetres (mm), with a tolerance of ± 20mm.

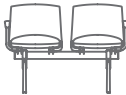

2-Seater without Armrest
