X-ten II

Benel

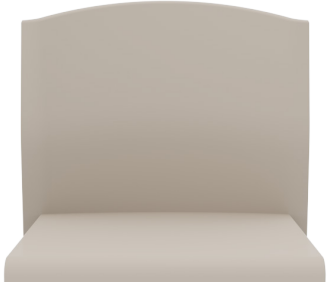

Promised stability and safety.

Xten II Single – The most sturdy patient chair you will ever meet.

Countless patients and caregivers have sat on an X-ten II across various healthcare institutions in Singapore, and you might be one of them! Robust, safe, and secure, X-ten is suitable for patients that require support while getting up or for expansive sitting space. Upholstery options for the seat and back are also available for additional comfort.

Features of X-ten II

01 No Perforations

For ease of maintenance and infection control, surfaces are smooth without perforations.

02 Armrests – Ease of Use

Specially designed armrests allow bag straps or clothing to slide off easily, reducing the risk of falling.

03 Armrests – Additional Support

Sturdy and extended armrests provide additional assistance to weaker patients in getting up from their seats.

04 Stackable

X-Ten II Single is stackable for easy storage, maintenance, and convenience for flexible setups when required.

05 Colour Options

Contemporary design with a neutral colour palette matches all modern designs of clinical waiting areas or gives life to older clinical areas.

06 Certification for Safety

ANSI/BIFMA X 5.4 - Lounge Seating

To ensure the safety of users, our patient chairs have been certified to prove that it is safe and can provide extended durability.

07 Certification for Low Chemical Emission

GREENGUARD GOLD

X-Ten II is certified for low chemical and VOC emissions to ensure improved indoor air quality for everyone.
